Chemical Lime Company
P.O. Box 537
Grantsville, Utah 84029

Dear Mr. Curtis:

On June 18, 1998, we approved your Plan of Operations for milling and stockpiling activities on your Dolomite 1-3, 10-12, and 23-26 mill sites located in T. 1 S., R. 7 W., Section. 25. On July 2, 1998, we received your request for a 90-day extension of time to complete Item #5 of our approval, in which Chemical Lime Company (CLC) was required to remove any stored debris or inoperable equipment from the mill site, including broken-up steel and concrete, pieces of steel stored for future use in the construction and modification of the adjacent mill facility, and trash, wood and other assorted junk. On July 9, 1998, we granted a 90-day extension to CLC, with the stipulation that all of the subject material and debris must be removed from the subject mill sites by October 22, 1998.

On October 22, 1998, we received your letter in which you stated that "CLC has removed the structures in question," pertaining to Item #5 of the Plan approval. On November 12, 1998, a follow-up inspection of the mill site area was conducted. At that time, it was observed that there remains an extensive pile of broken-up concrete and steel lying at the base of the pad area, along its west flank.

The subject concrete and steel must be removed from the mill site within 30 days of receipt of this letter, or CLC will have established a Record of Noncompliance for failure to prevent unnecessary or undue degradation of Public Lands, as described at 43 CFR 3809.1-5(c)(5).

We have enclosed a photo of the west flank of the mill site, which shows the subject concrete and steel that must be removed. If you have any questions, or require additional information, please feel free to contact Michael Ford of my staff at (801) 977-4360.

Sincerely,

GLENN A. CARPENTER
